The importance of negative results' reviewers

David Alcántara

Editor in Chief, The All Results Journals:Chem

The mission of *The All Results Journals:Chem* is the communication of excellent research work obtaining negative results from all fields of Chemistry. Clearly, a scientific journal's greatest responsibility toward the scientific community is to ensure that all contributions accepted for publication are rigorously but fairly reviewed, specially in a journal of negative results like this. For this reason, all manuscripts published in the journal are reviewed by expert referees. The final quality of papers accepted for publication depends to a considerable extent on the reviewers, who give valuable constructive criticism to the authors. The input and dedication of all our reviewers are highly appreciated by both the editors and the authors.

Victor Sebastian Cabeza

At the end of 2014, we gratefully acknowledge the valuable support of the following scientists who have reviewed papers for the journal during the past 12 months:

Alvaro Salvador Gonzalez
Ana Aranda Pérez
Antonio Jesus Ruiz Sanchez
Carmen Muñoz
Carsten Bolm
Daniel Collado
Daniel Jimenez
Isabel Morato Rojas
Jaleh Mansouri
Jeremiah Johnson
José Juan Marrero Tellado
Manuel Alcarazo
Manuel Pernia
Mark Karver
Svetlana Tsogoeva
Vasco Bonifacio
